

OVERLAND WATER PROTECTION & SEWER BACK-UP

They say that water is the new fire which means in terms of claims, Water Damage has a higher frequency rate than Fires. Due to the changes in our climate, your coverages have also changed to reflect these changes. As result Aviva Insurance has introduced:

Overland Water Protection

It helps to protect against loss or damage caused by **HEAVY RAINS, SPRING RUN-OFF and OVERFLOW FROM LAKES & RIVERS.**

OVERLAND WATER does not include FLOOD WATER as FLOOD WATER refers to coastal flooding from salt water, such as tsunamis and tidal waves (this is not covered).

Sewer Backup

This differs from **Sewer Back-Up. Sewer-Back-Up** protects you from water coming into your property from a sewer, septic system or sump pump.

It is possible to insure your property for both OVERLAND WATER & SEWER BACKUP.

Please indicate which coverage you would like on your policy:

OVERLAND WATER:	YES	<input type="checkbox"/>	NO	<input type="checkbox"/>
SEWER BACKUP:	YES	<input type="checkbox"/>	NO	<input type="checkbox"/>
